

# The Dalles

## NOAA Weather Radio

NOAA Weather Radio (NWR) station WXM-34 provides weather information and forecasts for the Columbia Gorge. Counties in the broadcast area include Klickitat and Skamania in Washington and Hood River, Wasco and Sherman in Oregon.

The Dalles NWR originates from NOAA's National Weather Service (NWS) in Pendleton and transmits on a frequency of 162.400 MHz from Stacker Butte, Washington using facilities provided by Q-104 radio. Additional funding for The Dalles NWR was provided by the U.S. Department of Agriculture Rural Utilities Service.

Any radio with the weather frequency can receive the broadcast, though reception quality will depend upon terrain and distance from the transmitter. Specially built weather radios have the ability to alert you when the NWS issues a weather warning. Weather radios are sold at electronic stores and many discount and department stores. A list of weather radio manufacturers can be found at <http://www.nws.noaa.gov/nwr>

WXM-34 is part of a nationwide network of NOAA Weather Radio transmitters. A portable or vehicle installed weather radio will allow you to receive weather updates on one of these seven frequencies while traveling.

162.550 MHz

## Programming on NOAA Weather Radio Station WXM – 34 includes

Severe weather watches, warnings, and special weather statements when needed.

Hydrologic statements such as flash flood warnings and watches when needed.

Forecasts for the Columbia Gorge, the Northern Oregon Cascades, North Central Oregon and the East Slopes of the Southern Washington Cascades.

Extended forecast up to 7 days.

Outlook up to 14 days.

Hourly regional weather reports.

Climate and statistical data.

Non-weather emergency information when needed.

Updates are provided whenever they are available. During potentially dangerous weather events, NOAA Weather Radio programming may be interrupted to issue warnings. If your weather radio alert receiver is in a standby position it should automatically alarm to inform you of warnings. NOAA Weather Radio is an important part of the Emergency Alert System (EAS).
